SELECTED PROJECTS

Tatta Business

POS & ERP, Website, CRM & Licensing · tattabisnis.com

Vue 3 / TypeScript / Django / SQLite / PostgreSQL / Capacitor

- Developed an offline-first POS and ERP for sales, purchasing, inventory, accounting, and branch operations on Android and desktop.
- Built the product website and a Django back office for customer management, subscriptions, licensing, billing, and support.

BCP POS

PT Business Creativity Perfume · Perfume POS & Accurate integration

Node.js / Express / Accurate API / Electron

- Developed a Node.js POS integrated with Accurate Online, with custom discounts and customer loyalty linked to Accurate customer records.
- Implemented cash, transfer, QRIS, debit, pay-later, and split payments; developed branded sales invoices (PDF) and receipts (images).

Meem Parfum

Operational POS & ERP, accounting reports & AI assistant

React / TypeScript / Node.js / Capacitor

- Developed an operational POS and ERP for refill sales, material inventory, purchasing, cashier closing, and accounting reports including profit-and-loss and balance sheets.
- Implemented BOM-based product costing and weighted-average material costs.
- Added an AI assistant for natural-language questions about products, inventory, sales, and store reports.

Diwan Al Oud POS

Operational POS & ERP with multi-unit inventory

React / TypeScript / SQLite / Capacitor

- Developed an offline-first operational POS and ERP for oud and perfume, with multi-unit inventory, purchasing, stock adjustments, and profit-and-loss and balance-sheet reports.
- Implemented Indonesian, English, and Arabic interfaces, including right-to-left layouts; packaged the application for Android and Windows.
